

CLAY ROOF TILE

claymex.com

Why Clay Tile?

Clay tiles have often been imitated but their unique properties cannot be duplicated.

A genuine clay tile is made from earth's natural materials and transformed by fire, giving it a long lasting appearance, increasing the curb appeal and adding a distinct and exquisite look.

The great thermal and acoustic properties of clay tile will add comfort and energy efficiency.

It's no wonder why for centuries clay tiles have been the predominant roof cover all over the world.
